About Beach Buggy Racing 2. Beach Buggy Racing V APK Feature 3. Get Beach Buggy Racing V APK 4. More Beach Buggy Racing Overview

About Beach Buggy RacingIt's been four years since I tasted the fresh aroma of the beach. Beaches in general, used for sunbathing, playing volleyball or surfing. But in beach buggy racing game, you will make the beach an arena for car games. Don't be so serious so afraid that this race will contaminate the beach, but it's just a game. So the word Buggy in the title of this game also doesn't mean this game is full of bugs, so re-calm yourself. If you are calm, let's see more about whether the race at Beach Buggy Racing is good or not. There are six types of race modes at Beach Buggy Racing. There is a standard race mode where you have to race to reach the finish line before your opponents, the time trial mode where you will run alone so the time you reach the finish line will be pitted against other players, there is also a mode where you must destroy objects in the track area as much as possible and it is no less exciting is the state of the boss versus the collecting object , where you have to follow the path that your opponent has passed correctly in order to collect objects issued by your opponent. You will take a run on the beach trail, according to the title containing the word beach. On the racetrack, you will find various kinds of power-ups that are ready to be your savior to be at the forefront or even become a stumbling block if power-ups fall into the hands of the enemy. Using Beach Buggy mod apk can increase unlimited coins and unlimited gems. You can open new characters, power ups, and other things. Beach Buggy Racing MOD APK Feature ✓ Unlimited Coins✓ Unlimited Gems✓ No root needed ✓ Apps directly on mobile ✓ SSL encryption on application Easy User InterfaceGet Beach Buggy Racing MOD APKLatest changelog: [📄 Adding brand new codes for mod Requirements: Android 4.0 versions or above Stable Internet connection Minimum 3G, while 4G and Wi-Fi are recommended Allow your device to install apps manually \(Check and approve unknown sources\)Download MOD APKDirect SSL ConnectionMore Beach Buggy Racing OverviewPower-up is divided into two, namely power-ups to attack and defend. To use it you have to press the action button located at the top right of your gadget screen. For those of you who are already used to playing Mario Kart or Crash Team Racing \(CTR\), I think you will quickly understand the mechanism of the game I just explained because the types of power-ups provided are not much different than the two games. More specifically control problem, your car will move forward automatically and to do operation just press the virtual button located on the right and the left side of the screen. By default, you can turn your car into tilt mode. However, you can also change the slope mode with a virtual arrow that allows the car to turn by pressing the virtual arrow button located in the center left and right center of the screen. For me personally , control of virtual arrow is the most convenient. Does this game use an energy system? Each stage you play requires energy as an entrance ticket. An energy requires a recharge of twenty minutes, and the maximum energy you can get is only five. So the time needed to reach maximum energy is one hour and forty minutes, enough to deflate the size of a racing game. But if you're super good at speeding, you don't have to worry about the existing energy system. Because if you get three stars on each stage you play, you will immediately get an energy free. You also need to upgrade your car regularly, which requires large amounts of money. Money is very hard to get into this game because every race that you have completed you are only rewarded with small amounts of money. So you have to be smart in managing money and diligently doing grinding to upgrade your car. The simple thing that just makes me itchy is the random power-up method that is in this game. When I'm at the bottom, I should have a greater chance of getting an attack type of power-up, but in fact I actually get more power-ups of the type to defend myself \(such as protectors or oil paint that makes another car slip behind us\) The kind of thing really disrupts my game's comfort and makes this game less festive. From the graphics and gameplay mechanism, Beach Buggy Racing is actually intended for kids. But when I play it myself, understanding which right now will change. In this game you are required to make proper turns, do precise operation, and quickly adapt to the surface of the ground. In Beach Buggy Racing, the surface factor is very influential in acceleration and handling in turn. For example, on the surface of clay, your car will have harder turning and slower in acceleration than when your car is on the asphalt surface. Not to forget, the track design was made quite interesting. You will not only pass through the open track, but also will feel the darkness of the cave, the fast fountains and the steep cliffs ready to make your race more colorful. A total of twelve tracks will accompany you to the race to become the number one racer in this game. To finish Beach Buggy Racing, you have to spend a lot of time. It could be that you need more than ten hours to finish it. Because, the stage is relatively large. There are 105 stages in this game, all of which are divided into 15 worlds, consisting of many world themes. So your experience of racing here will always be different from time to time, the good effect is obviously boredom will be difficult to land on your head. Speaking of power-ups, the good news that you can hear is that you will find 27 different types of In the first instance, you only have power-ups that you can use. Bad news. The remaining thieves only you can open using a diamond, there is none other than IAP currency in this game. So pathetic. It's not just cars that you can tinker with. You can also process similar drivers. Nine drivers are ready to steer your car to be the fastest on the racetrack. Each driver has their own special skills. You cannot arbitrarily replace the driver because the eight drivers whose status is locked. If you want to open other drivers, you must defeat them first. Worse, even if you beat them, you don't really get the driver you just defeated, there's still one more step you need to do, which is to pay an IAP then you can get a new driver. Back a moment to the question of energy. The stingy energy of this game has an impact on the number of coins you can receive. The coins needed in this game are not in line with your needs. I can hardly buy car equipment that matches my last level requirements. The solution, of course, is to do grinding, but my effort is back in the middle of a stingy energy problem in this game. Sometimes it makes me a little lazy to play Beach Buggy RacingUnlike the energy that deserves a thumbs up on the head, the graphics in this game should give you a big round of applause. Details about each object you see are very smooth for the size of a mobile game. Plus the effect of raindrops on the screen, the more it makes my heart amazed by the graphic quality highlighted by the game made by this Vector Unit. Without playing it, even from screenshots you would have nodded in agreement with my opinion right? Beach Buggy Racing generator can make your character more cool or beautiful. Simply using these gems and coins generators to make it happen. For those of you who use iPhone 5s or iPad Air, you can also enjoy the sophistication of Metal API technology from iOS 8. I have tried the power metal API myself. As a result, the Air Hendri iPad compared to my iPhone 5 excels a little in the details of the object and blurring effect that looks sharper and certainly more beautiful. You can get Beach Buggy Racing for free both on iOS and on Android. There are ads that very rarely appear in this game. IAP itself is not mandatory, but if you want to buy it, then you should be ready to review the contents of your wallet. There is an IAP that can make your coin statement double at the end of each race. The most interesting thing, of course, is IAP to remove energy, but the price tends to be expensive. Not to mention if you want to open all available power-ups and want to open all existing drivers. Apart from the expensive energy and IAP systems. Beach Buggy Racing offers a racing experience that is quite fun for mobile devices. The mechanism of the game is easy to learn and suitable for all ages. Plus graphics quality is very stable so it can cover the two shortcomings it has. So do not hesitate to download this one game. ConclusionBeach cheats android offers many gems and and You can replenish your energy instantly using this cheat.
